Water ingression protection for connectors, enclosures and terminals

LANOTEC DI-ELECTRIC GREASE

Made from pure natural Lanolin, the AusProTec™ Lanotec Di-Electric Grease has been specifically formulated to protect connectors, enclosures and terminals from water ingression and corrosion.

Lanolin is a natural, unique substance produced by sheep to form a coating on wool fibres to protect them against the elements.

Available exclusively to RCT in 50ml syringes, this environmentally friendly grease is non-toxic, acid resistant, bio degradable and non-conductive up to 70kV providing a natural alternative to other corrosion inhibiting products.

Features

- Environmentally friendly
- Non toxic
- Acid resistant
- Biodegradable
- Non-conductive to 70kV
