CONTROLMASTER®

Continuous dragline clean-up operation with remote control

Dragline and Heavy Equipment Support

Draglines and shovels are the prime movers of waste on most mining operations. Any shutdowns or productivity reductions to these machines can seriously hamper the effectiveness and profitability of the entire mine.

Remote control operation of dozers and other support equipment can safely and dramatically reduce these interruptions to productivity.

RCT has over 40 year's experience with machine control & safety solutions. Others talk; we are the real deal, with over 1000 working examples in 60 countries. If you're serious about safe mining then we're serious about helping you.

Features

- Multiple options of remote control solutions
- OHS issues are minimized
- Operator can control the machine from ground level, control room, pickup mounted station or the
- cabin of the dragline
- Total flexibility of remote/manual control
- Complete technical support & training
