

Easy identification of machines

LED Fleet Numbers

The LED Fleet Numbers have been developed for situations where it is difficult to identify machines from a distance.

Each Fleet Number plate is 700mm (high) x 400mm (wide), meaning that even from a far distance these numbers are clearly visible day or night, for quick machine identification.

Number kits can be configured to make complete fleet numbers. Number kits (0-9) are supplied with a single plate, the correct quantity of red 24V LED strip lamps to make the number, electrical terminals, and mounting bolts for both the plate and the LED strip lamps.

Features

- Low maintenance
- Long life
- Improves safety
- Increases visibility
- Expandable fleet numbers
- Easy to assemble
- Low current draw

LED FLEET NUMBER KIT 1
