AUSPROTEC™

Helping to identify your equipment from a distance - day or night

LIGHT VEHICLE LED FLEET NUMBERS

The PowerLight™ LED Light Vehicle Fleet Numbers have been developed for situations where it is difficult to identify vehicles from a distance, each plate is 275mm tall and 145mm wide. This means that even from long range these numbers are clearly visible day or night, making for fast machine identification. Number kits can be configured to make complete fleet numbers.

Number kits (0-9) are supplied with a single plate, the correct quantity of red 12 / 24V LED strip lamps, electrical terminals, mounting bolts for both the plate itself and the LED strip lamps.

Features

- Low Maintenance
- Multi voltage – 12/24v
- Compact in design
- Long Life
- Improves safety
- Increases visibility
- Expandable fleet numbers
- Easy to assemble
- Low current draw
