Smarter and safer seatbelt interlocks

SEQUENTIAL SEATBELT INTERLOCK - Toyota 8 series

The Sequential Seatbelt Controller (SSBC) is the smart and safe product to ensure operators of forklifts are secured into the seat.

The controller is programmed to assist operators in following the correct sequence when applying their seatbelt. The SSBC has smart technology that prevents operation if the correct sequence is not followed and will indicate to the operator through a LED light.

The kits are custom designed to suit all 8 series Toyota forklifts, and have been designed to plug an play into the Toyota machine wiring.

This allows for simple and fast installation of the kit to any 8 series Toyota forklift.

Features

- Designed to meet AS2359-6
- Quick installation time
- Programmable engine shutdown time
- Fully sealed product to suit all conditions
- Improves operator safety
- High voltage systems available
