AUSPROTEC™

Reliable connectors for harsh environmental applications

Deutsch DTM Series Field Service Kit

The AusProTec™ Deutsch (DTM series) kit has been designed to assist service technicians perform cable and wiring jobs that require more than one size of connector.

The kit contains a selection of DTM series Deutsch plugs, wedges, receptacles, contacts and contact removal tools. The Deutsch components are housed in a compact steel case, which is both durable and easy to carry.

The Deutsch (DTM series) kit is an essential tool for any technician servicing equipment utilising Deutsch Data connectors. The kit is ideal for workshop environments, on site and field service applications.

Deutsch connectors are one of the most widely used connectors on the market because they are extremely weather and impact resistant. The DTM series Deutsch plugs can withstand operating temperatures peaking as high as +125°C. It is for these reasons that Deutsch are commonly used by Original Equipment Manufacturers across a diverse range of industries including mining, automotive, industrial and marine.

The kit includes all plugs, receptacles, wedges and contacts for 2, 3, 4, 6, 8 & 12 terminal DTM series connectors. It also contains contact removal tooling.
