EARTHTRACK®

Maximise production by accurate payload

EXTERNAL DUAL PAYLOAD DISPLAYS

The ability to gauge an accurate payload can be the difference between meeting and missing production targets.

The EarthTrack External Dual Payload Displays are placed in view of the operator and are designed to assist both loader and digger operators in ensuring production targets are met, every time!

This production tool has been designed to display the payload weights being loaded onto a dump truck on a large digit display mounted to the haul truck.

These dual displays relay important information to site, including how much material each truck is moving per shift, day or week; allowing them to keep an accurate record of tonnage.

The EarthTrack External Dual Payload Displays can be configured to switch off once the vehicle is at capacity, or switch off while the haul truck is travelling.

Features

- Suitable for CAT, Komatsu and Hitachi haul trucks
- Single or dual display kits available
- Simple to install and maintain
- Built to withstand the harshest conditions

Specifications

Display Dimensions	560mm x 300mm
Controller Connections	Serial and CAN
IP Rating	67
Controller	Fully configurable

Parts

APN:	4557	LED FLEET NUMBER 4 DIGIT
APN:	11484	CONTROL EXTERNAL DISPLAY PAYLOAD GEN 2
