CONTROLMASTER®

Don’t expose your operators to the dangers related to stockpile management

STOCKPILES

Falling into hoppers, driving over edges or venturing onto unstable ground is an ongoing concern to stockpile operators. Similarly, low oxygen or heavy dust can increase the risk to personnel while decreasing productivity.

Remote control operation is an effective way to remove your operators from the danger zones while increasing productivity.

RCT have solutions to suit your operation.

RCT has over 40 year’s experience with machine control & safety solutions. Others talk; we are the real deal, with over 1000 working examples in 60 countries. If you’re in the business of handling bulk materials, we’re in the business of helping you do it safely, so let’s talk.

Features

- Dramatically improved operator safety
- Improved ergonomics
- Improved view of entire work area
- Full manual/remote flexibility
- Less downtime waiting for optimal conditions
- Operator can control the machine from ground level, mobile or fixed control room, utility mounted station or stockpile control room
- Full technical support & training
