CONTROLMASTER®

Business risk is managed and production continues

Surface Loader Remote Solutions

Loader operators are often required to operate in unstable or high risk environments. RCT can convert loaders to remote control which removes the operator from the driver seat - enabling them to tackle the more hazardous tasks without the risk of injury; making them more confident and productive. RCT remote control solutions allow remote operation of loaders from a distance away with greater overall vision of the surrounding work area. Business risk is managed and production continues.

Within the last 10 years, RCT has successfully engineered and installed Remote Control Packages for the following loaders:

Caterpillar: 963D, 980G, 980H, 988H, 992G, 993K

LeTourneau: L1850

Komatsu: WA 470-1, WA 470-5

All RCT remote packages are also customizable for any make of model of loader.

RCT's remote package is ideal for the safe operation of loaders in the following applications:

- Truck Loading
- Crusher Feed
- ROM Feed
- Ordnance Removal
- Clean Up
- Fire Control
- Rehabilitation Works

Features

- Improves operator safety in high risk operating conditions
- Maximizes loader utilization
- Ensures greater overall operator vision for more effective operation
- Improved ergonomic operating environment for increased operator comfort
- Easy to operate and maintain in unstable conditions
